

FOR IMMEDIATE RELEASE

EUA Welcomes Sustainability Practice Leader Dave Hubka

MILWAUKEE, WI, March 7, 2023 — EUA is pleased to announce that Dave Hubka joined the firm as its sustainability practice leader. Dave has over 25 years of experience in the architecture and engineering industry and is a globally recognized expert in sustainable building practices. He will help lead and advance EUA’s sustainability-related efforts.

A graduate of the University of Wisconsin-Milwaukee, Dave spent the first decade of his career as a mechanical engineer designing building systems. Most recently, he was a consultant who helped companies worldwide design, build and operate sustainable buildings. He contributed to several EUA projects during that time.

“Dave will bring inspirational leadership in sustainability to EUA,” said EUA President Kristin Dufek. “He has an excellent reputation in the industry, and he will enhance our capabilities to continue making great decisions for our clients, projects, and industry as a whole.”

Dave joins an established team of sustainability professionals at EUA, including accredited architects, engineers, and designers who guide clients through various green building rating systems and programs. The firm participates in the American Institute of Architects 2030 Commitment, a national framework to work towards offsetting carbon emissions by 2030.

“It is my belief that sustainability begins at the start of design and carries throughout the entire lifecycle of a project; at EUA and together with this team, I look forward to delivering thoughtful design solutions for our clients,” said Dave.
