## **Breast Care Team Again Earns NAPBC Accreditation**

*Dr. Natalie Luehmann, MD, and the team of specialists uphold top patient care*

GREEN BAY — Dr. Natalie Luehmann, MD, and her team at Aurora BayCare Medical Center Comprehensive Breast Care Center, have again earned accreditation from the National Accreditation Program for Breast Centers (NAPBC).

As an American College of Surgeons (ACS) Surgical Quality Partner, the Center continues to uphold the highest standards in surgical excellence and patient-centered care.

“This accreditation affirms the Center’s ongoing commitment to providing the highest quality breast care to our patients, from the time a patient is diagnosed, through their treatment and into survivorship,” said Dr. Luehmann.

Luehmann, a breast surgeon with Aurora BayCare General & Vascular Surgery, is the only fellowship-trained breast surgeon in Green Bay. Luehmann’s fellowship training has given her specialized, up-to-date surgical techniques for various types of breast cancer surgery. Her training places her at the leading edge when it comes to providing treatment options to her patients.

“The NAPBC accreditation recognizes the work we do each day to provide quality care to patients in Northeast Wisconsin,” said Thomas Miller, President of Aurora BayCare Medical Center. “Dr. Luehmann and our Comprehensive Breast Care Center continue to grow the department in surgical excellence and top patient care.”

Luehmann partners with a team of specialists at Aurora BayCare Medical Center Comprehensive Breast Care Center, including board-certified surgeons, oncologists and radiologists who offer services including breast biopsy, lumpectomy, mastectomy and other treatments. The Center was the first breast center in Wisconsin and one of the first four centers in the nation to receive NAPBC accreditation.

**About BayCare Clinic**

BayCare Clinic, [baycareclinic.com](http://baycareclinic.com), is the largest physician-owned specialty-care clinic in northeastern Wisconsin and Michigan's Upper Peninsula.
