

Member Spotlight – Ultimate Air, Inc.

The Ultimate Air team in front of their headquarters in Luxemburg, WI.

Air quality should be at the front of everyone's mind, especially when indoors. Ultimate Air, Inc., specializes in providing first-class air quality and heating and cooling systems. The company's goal is to help families live a more comfortable, healthy, and safe life within their homes.

Headquartered in Luxemburg, Ultimate Air serves the Northeast Wisconsin area, including Brown, Kewaunee, and Door counties. From its humble beginnings in a garage, the company has seen exceptional growth, since acquiring two additional heating and cooling companies along with the residential division of another.

Their expert staff offers advice and explains the importance of preventative maintenance. Maintaining equipment prolongs the life of the system, saves on the fuel bill, and avoids the inconvenience and cost of breakdowns—much like the routine maintenance and oil changes for a car.

Jeff Blemke, Owner, offers this quick advice: "Try not to block your vents with furniture in your home.

Your furnace needs air to breathe just like we do." Blemke also explains the importance of carbon monoxide detection, stating that it is best to keep a monitor near bedrooms to keep families safe and healthy, especially since carbon monoxide rises and has no odor or color.

Ultimate Air assists a wide range of clientele, including family homes, apartment complexes, and even commercial buildings such as restaurants and offices. With a commitment to safety and using top-of-the-line products, they provide clients with peace of mind in their homes and businesses. Ultimate Air technicians also pursue ongoing training to not only consistently offer top service, but also ensure their own safety and wellbeing while on the job.

For the client's comfort, Ultimate Air utilizes a convenient dispatching software tool that sends a text message to a client when a technician is on their way. The message also sends a photo and details of the employee to help make the client feel more at ease

with who's coming into their home or business.

As a way to give back to the community, Ultimate Air partners with Lennox Industries through the "Feel the Love" program and installs a free furnace for a family in need every year. They also support many local churches, sports teams, and community events, as well as the local 4H club.

"Every day is a new challenge, but we find ways to go around it. Who knows what the future may hold for us, but our plan is to continue to provide honest and great service for our clients," says Blemke. "It's important to us to know that we are helping families live a more comfortable, health, and safe life in their home—which will always be needed. If we, as a team, continue to provide this level of service and give them honest solutions to their needs, our company will be able to weather any storm."
