

October Tonnage Totals for the Port of Green Bay

For Immediate Release

November 18, 2024

(Green Bay, Wis.) – Tonnage at the [Port of Green Bay](#) totaled 139,876 tons during the month of October, bringing the year-to-date total to 1,404,633 tons. Compared to the same period last year, year-to-date totals have decreased by about 9%.

“We experienced a busy shipping month during September, with about 26 ships visiting, only to see things slow down a bit in October with 19 vessels,” shared Dean Haen, Port of Green Bay Director. “Like any other shipping season, it’s common to have fluctuations month-to-month as tonnage ebbs and flows, based on regional, national and global demand.”

The leading cargo during October was cement at 60,874 tons, with limestone coming in a close second at 60,424 tons. Other cargos during October included petroleum products (8,615 tons), coal (7,963 tons) and wood pulp (2,000 tons).

So far this season, 147 vessels have entered the Port; 128 were Lakers, 13 were Canadian flagged ships and 6 were foreign vessels. During that same period last year, 141 vessels had visited the Port.

“We’re looking forward to a strong end to this year’s shipping season,” Haen added. “We’re grateful for the efforts of all involved in supporting Northeast Wisconsin’s strong economy.”
