

# HEAT UP YOUR FUTURE SKILLS COMPETITION

## The 2024 Heat Up Your Future Skills Competition

challenges student teams to complete a pipe stove project based on specific design requirements. Projects are judged on correct dimensions, weld quality, and design/appearance. The competition allows local high school students to test their skill and connect with experts in the trades. Plus, there will be a drawing for one lucky school to win a Miller 211 MIG Welder. We're excited to see all your hard work on February 7th.

***Get ready to heat up your future!***
